The Embossed Wall Flats are designed to expand in any direction with an automatic pattern repeat. Cover an existing wall, help disguise a not-so-smooth wall or add a modern pattern to any room setting.

They are good for the environment too, because they are made from bamboo pulp, one of the world's most renewable resources. No trees were harmed in the making of this product.

Customize them by rotating every other tile or row, mix-and-match patterns or paint them to coordinate with your decor. The rule is there are no rules and the important thing is to have fun with it. It's low stress, low commitment and a big payoff in the way Wall Flats impact a space.
