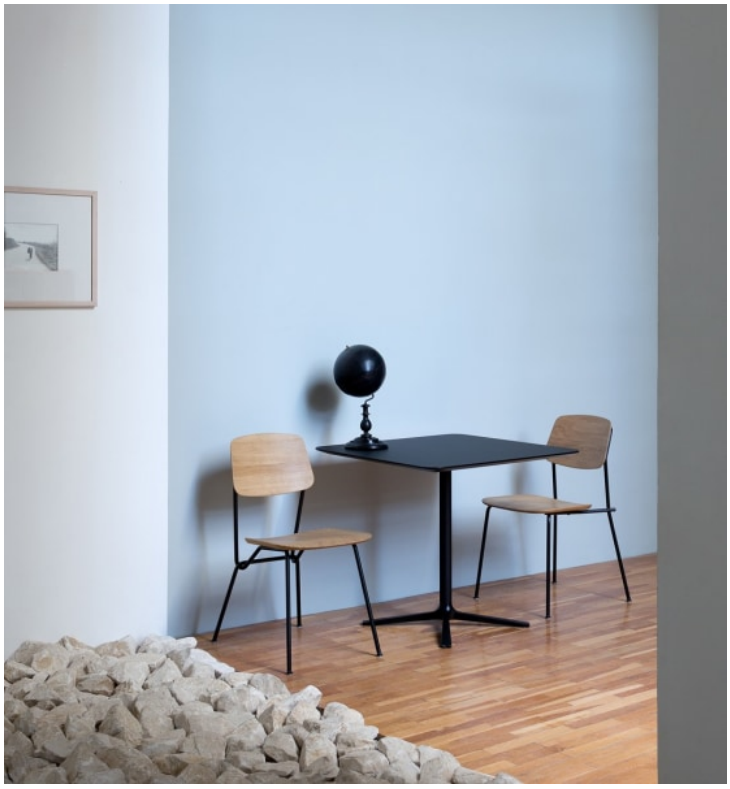
INTERSTUDIO

Unstrain Dining Chair

Designed by Prostoria



Strain and Unstrain are like twins in the Strain collection but convey their own typology. Both chairs have a universal flair with their ergonomic design of a solid wood seat that can be additionally upholstered with leather or fabrics for superior comfort. They create the perfect solution for interior residential or public spaces.

The ‘strain’ theme continues in the solid wood and ergonomically shaped saddle-like seat of a barstool, thus offering various ways of dynamic seating. Visually light and uncustomarily slender, the collection further consists of tables of various heights and finishes, and two newcomer chairs – Strain and Unstrain. Similar in even more simplified Strain form, their difference lies in the key family feature of intertwisting leg junctions. While Strain retains the twist, which provides the necessary construction stiffness, Unstrain releases it, resulting in the a contemporary interpretation of the 1950s universal chair, which is easily stackable.

Dimensions:
W48xD55xH81xSH45
With Arms W49xD56xH81xSH45

Material: Seat: solid wood / solid wood with cushion / plywood + lacquer or colour lacquer / plywood upholstered **Back:** solid wood + lacquer or colour laquer, plywood + lacquer
