INTERSTUDIO

Stella

Stella is spacious and comfortable lounge chair, which is ideal for both relaxation and communication in public spaces. The expression is tight and light without compromising the degree of comfort. The wide back, which also functions as an armrest, is attached to the seat only at a single point, which gives an impression of an almost floating back of the chair. Moreover, this detail leaves an increasing space on the sides between seat and back, which offers the user multiple seating positions. The degree of comfort has been paramount in the development process. Therefore, Stella is a chair that functions well for extended as well as short stays and pauses in a hectic everyday life. Comes with an aluminium return swivel base.
