Hudson Collection

by Emeco

The Hudson Chair, designed for the Hudson Hotel in New York City, was Emeco and Philippe Starck's first collaboration. Starck described the chair as "washing the details from the Navy Chair." It takes an additional 8 hours to polish each Hudson Chair.

The world's best architects and designers collaborate with us to design chairs that are built and guaranteed to last a lifetime.

As we apply what we've practiced in the past, we are looking toward the future. We are on a mission to make a positive impact on the environment. Our goals are to use waste material in our products, use as little energy as possible in our manufacturing, generate a minimum of waste in the process, and build strong, durable, beautiful chairs that last through generations. We've been on the same mission since 1944 and we will continue to search for new ways to recover and utilize discarded materials and make products that last.
