Butterfly

The Butterfly series is designed by Niels Gammelgaard, one of the most recognized furniture designers in Denmark. Niels design is based on the Danish design tradition, letting for follow function.

The base is a seat/back shell in laminated wood, with a very high level of comfort due to the lumbar support, rounded front edge and flexibility in the back of the chair. Butterfly is also stackable.

The Furniture is made from sustainable Nordic woods, oak, beech and maple, combined with steel in some models.

Butterfly is a design family of four main versions: Butterfly with four steel legs, Butterfly wood, Butterfly on a steel sled base and Butterfly swivel chair on glides or castors. Upholstered versions also available. All models are available with or without armrests.
