Bella Acoustic Panel

By Offecct

Soundwave® Bella is an acoustic panel designed by the Danish architectural office 3XN. The panel was designed for the Bella Sky Hotel in Copenhagen and fits well with 3XN's architectural project in its entirety.

"When we designed the Soundwave® Bella we were inspired by the very sharp character of the building itself with its absence of right angles. The reference to the building became even clearer when we decorated an entire wall of each conference room with Soundwave® Bella in white", says Kim Herforth Nielsen, founder of 3XN.

"The flexibility of the Soundwave® system allowed us to give each conference room a separate identity by having one square on each wall in a unique color in order to distinguish the different rooms", concludes Kim Herforth Nielsen.
