Luna Acoustic Panel

By Offecct

Soundwave® Luna is designed by Teppo Asikainen. Luna is one of the first acoustic panels in the successful Soundwave® series. Its designed to absorb sound in the lower frequencies.

Soundwave® Luna is a heavyweight broadband absorber with extended efficiency in the low frequency range (150 Hz-500 Hz). This panel is very efficient in reducing the reverberation time (sound ‘’bouncing around”) in a room. This means that disturbing background noise will be reduced and voice intelligibility will be greatly improved.

Dimensions
H585 x W585 x D73

Material: Recyclable moulded polyester fibre in anthracite, grey and offwhite..
