Scrunch Acoustic Panel

By Offecct

Soundwave® Scrunch is designed by Teppo Asikainen. The inspiration for the pattern of Scrunch comes from a creased paper.

Sound and acoustics are two of the most important and most overlooked factors when it comes to creating the right atmosphere for interaction in areas where people communicate and socialize. The combination of form and function in Soundwave® does not only give the panels a great appearance, but also serves the function of absorbing and reflecting sound.
Scrunch is a lightweight sound absorber in the upper frequency range (500 Hz and above). These panels help reduce disturbing reflections of environmental noise such as voices, telephones

Dimensions
H585 x W585x D60
