INTERSTUDIO

Scoop Chair

Scoop is a contemporary chair for all spaces. The innovative gyroscope like suspension system enables the user to tilt the chair forward and backwards, which conveys a feeling of being carried - a free suspended feel. The Y-shaped aluminum beam creates a visual and functional overlap between seat and base. Scoop merges craft and technology. The innovative technical edge increases comfort and maintains a clear and simple Scandinavian appearance. Available in a conference and lounge chair edition. Family also comprises a table in two different heights.

Dimensions
